PRINTMAKING SUPPLIES

2026 CATALOG

McClain's Printmaking Supplies

Dedicated to the Art and Artists of Relief Printmaking

For over forty-five years, McClain's has imported tools and relief printmaking materials from Japan as well as supplies for woodcut, linocut, engraving, and monotype printmaking from around the world. Our mission is to give relief printmakers the support they need to reach their printmaking goals.

Dear Friends,

Twenty-five years ago, in February 2001, I became the owner of McClain's Printmaking Supplies. What has made those years of hard work, long days plus the ups and downs of running a small business worthwhile is knowing that I am continuing the tradition of supporting other relief printmakers that began many years ago.

I am very grateful to Robert McClain and Dr. Yoko Matsuoka McClain, who started this business in the basement of their home in Eugene, Oregon in the late 1970's. At first, they sold prints for their famous Japanese printmaker friends and Robert gave demos to show how the prints were made. Soon people were asking for the supplies he was using, so they imported them as well. We still depend upon many of the Japanese suppliers and craftsmen that they found.

Thank you to Elaine and George Chandler, who took over the business in 1991 and continued the tradition of providing great supplies and service to their customers. A special thanks to Elaine, my first Moku Hanga teacher, for introducing me to an art form that I have loved for the past 30-plus years. During a class visit she had encouraged me to try one small, 3.0mm Namisei u-gouge. That tool literally changed my life.

Most of all, I am grateful to all of you for your words of encouragement, advice and support. McClain's would not be here without you, with your creativity and passion for relief printmaking. It has been a privilege to provide you with the tools and materials you need. Thank you so much.

In new business, we have been getting questions about tariffs recently. We pay the tariffs on all supplies as they arrive from overseas, so you will never see a tariff charge on your receipt. However, you will see price increases in this year's catalog. As a small business, we cannot absorb the extra costs that the tariffs have brought. We thank you for your understanding.

The MAPC (Mid America Print Council) 2026 Conference is being hosted by Louisiana State University in Baton Rouge and runs from Wednesday, October 7 through Saturday, October 10, 2026. We will be at the Vendor Fair with printmaking supplies, especially tools, to try out. We hope to see you there! <https://midamericaprintcouncil.org>

We all love talking with our fellow printmakers and are always happy to help solve any printing problems you may have, either over the phone or by email. McClain's is here because you are here and we never forget it. Thank you for your continuing support!

Sincerely,

Alex Prentiss

About the Cover Artist

Glowing Rose

24 x 15 Multiblock Color Woodcut on Tan Rives BFK, 2024

Valerie Diane Lueth

Pittsburgh, PA

www.tugboatprintshop.com
Instagram: @tugboatprintshop

Valerie Diane Lueth is a dedicated, multi-faceted artist, woodcut printmaker, small business owner and mother of two (Ayla & Rudy) living and working in Pittsburgh, PA. For the past 20 years, she has been operating Tugboat Printshop and creating her unique woodcut artworks with a grassroots approach to making and sharing that is hands-on and upbeat. A reverence for technique and steadfast patience for puzzling out the challenges of the woodblock medium pairs with her experimental and playful approach to carving, inking and publishing as she guides her exactly fine-tuned drawings into multiblock woodcut editions. Valerie's imaginative woodcuts pulse with intricate detailing, whim, warmth, and curiosity.

Valerie graduated from the University of South Dakota in 2004 with her BFA in Printmaking. She bought her first press upon graduation. Tugboat Printshop began operations in Pittsburgh in 2006. Valerie's drawings and prints have been exhibited, featured and collected by patrons, galleries, magazines, cultural institutions and museums in the US and abroad. More info and details about Valerie and her work at Tugboat Printshop can be found on her website, www.tugboatprintshop.com.

Join McClain's Gallery

We accept woodblock prints, linocuts, wood engravings, monotypes and monoprints to show in our catalog and online gallery. Artists are given recognition but there is no payment. The copyrights to all images belong to their respective artists. McClain's will not use the submitted art for any purpose other than display in our catalog, Instagram account or on our website without written permission and we will not release the material in whole or part to any person or company. McClain's reserves the right to decide which prints to accept for publication.

One print per person please. Choose the format easiest for you:

- Photos: Photos taken with a smartphone or digital camera usually work well. Be sure the image is square on the page and meets the size requirements.
- Scanned images: label the file with your last name, the title and save as a jpg. Resolution: 72dpi. Size: 1000 x 1000 pixels (14" x 14" or 35.5 x 35.5cm) maximum.

Email scanned files to mail@imclains.com or copy to a USB drive and send to McClain's, PO Box 230759, Tigard, OR 97281-0759, USA.

IMPORTANT: Please tell us 1) your name and the city and state where you live; 2) the title of the print; 3) the size of the image; 4) the technique used; and 5) your email, social media account or website address (optional).

Thank you very much for sharing your work!

Japanese Pronunciation Guide

Consonants

Japanese consonant sounds are pronounced pretty much the same as English consonants with the exception of the letter "r." Try placing the tongue softly just behind the teeth, as if you were saying "la," and make a sound half way between *r* and *l*. It should take hardly any effort to say. The "r" in the word "baren" uses this sound.

Vowels

While English has at least eighteen vowel sounds, Japanese has only five:

a	i	u	e	o
"ah"	"ee"	"oo"	"eh"	"oh"

So the word "moku hanga," the Japanese word for woodblock print, is pronounced "moh-koo hahn-gah."

Metric Conversions

Japan uses the metric system, so sizes for most of the supplies from that country are metric. All other measurements in the catalog are in inches. The rulers below will help you convert from inches to millimeters.

Blocks and Plates

Shina Plywood ArtPrint Linoleum Gomuban Monotype Plates

Shina Plywood

This fine-grained plywood comes from Hokkaido, the northernmost island in Japan. Shina feels virtually grainless as you carve it and it is dense enough to hold sharp edges through many printings.

A very thin layer of glue is used between the Shina plies, so compared to most plywoods, these blocks will feel more like solid wood as you carve them. Also, because the glue is thin, tools stay sharp longer and it is easier on them.

3/8" or 1/4" Plywood Comparison

- Because it is thicker, 3/8" is less apt to warp
- On a press, when carved on both sides, 3/8" can be printed without a ghost showing from the carved underside of the block
- If the block is to be carved on both sides, 3/8" is more economical
- If the block is to be carved on just one side, 1/4" is more economical
- Because it is thinner, 1/4" is easier to print on an etching press

If you plan to carve both sides of a block, tape a sheet of heavy paper to the side not being cut. This will protect it from dents and scratches while you carve the top side.

Grain On standard sizes, the wood grain runs parallel with the longest dimension. Custom blocks can be cut with the grain running parallel to the short dimension.

Storing To prevent warping, store blocks horizontally in a dry place. Protect blocks from dramatic shifts in humidity and temperature.

Cherry Plywood

We are still looking for a source of Cherry Plywood blocks that meet our standards. Please check the website periodically for updates. Thank you for your patience and understanding.

Bench Hooks

Keep both hands on the tool and out of harm's way. Bench Hooks are made from 3/8" thick plywood. The end boards are both glued and nailed for durability. The opening at the top allows blocks to be placed at any angle for easy carving. Another piece on the underside hooks onto a table to keep the bench hook in place.

Vertical Bench Hook

Mounted ArtPrint Linoleum

ArtPrint Linoleum is made in the Netherlands specifically for printmaking. It is stiff enough to hold fine detail and easily carved with any of McClain's woodblock carving tools. Mounted ArtPrint Linoleum is permanently bonded to a high quality MDF substrate chosen for its uniform thickness. The mounted blocks are 5/8" tall. To prevent warping, blocks should be stored flat in a dry place.

Custom sizes are not available however larger blocks can be cut down for a fee; please call for more information.

Gomuban

rubber plate

This firm, easy to carve, vinyl-rubber plate is used extensively in Japanese classrooms. Compared to softer rubber plates, Gomuban is just as easy to carve, but because it is firmer, it does not deform as it is being carved and it holds very fine details and crisp edges.

SAVE 5%

Receive a 5% discount on 12 or more plates.

Togituna Japanese Carving Tools

Futatsu Wari Moku Hanga To Moku Hanga Nomi Mallets Josei Moku Hanga To Namisei Moku Hanga To Tool Sets

Futatsu Wari Moku Hanga To

two part woodblock carving tools

Made by *Togituna*, master craftsmen in Japan, using techniques passed down for generations, these hand-forged blades are some of the only tools in the world designed specifically to carve *yama sakura*, the hard mountain cherry traditionally used for Moku Hanga. The material choice, blade geometry, bevel angle and handle design all reflect this legacy of artisans honing their craft for centuries.

Futatsu Wari blades are made of high-carbon #2 Blue steel forge-welded by hand to wrought iron, which provides both an extremely sharp cutting edge and a tool that can be easily sharpened. Compared to Josei or Namisei tools, these blades are more robust and they work exceptionally well on any carving substrate from hardwoods like cherry to softer woods like Shina plywood. Komasuki have a deeper U shape compared to Maru To and Aisuki have a bull-nose or fan shaped tip so they glide more easily through wood compared to Hira To. The blades are approximately 8cm (3 1/8") in length and are designed to be re-sharpened, repositioned, and eventually replaced.

Futatsu Wari handles are made of *kaba* (birch). The brass ferrule can be removed, allowing the handle to swivel open to reveal the blade within. The brass ferrule on the Hangi To can also be removed so the blade will slip out of the groove that holds it in place. The total length of the assembled tool is approximately 12.5cm (5") and the end of the handle is rounded to fit comfortably into the hand when held in the traditional Japanese two-handed grip (see upper left).

Moku Hanga Nomi

woodblock carving chisels and gouges

Moku Hanga Nomi
top to bottom:
Fukagata Maru Nomi
Asagata Maru Nomi
Soai Nomi
Kento Nomi

The blades of Nomi tools are made of the highest quality hand-forged steel, and the handles are lacquered *kashi* (Japanese oak), one of the strongest and most durable woods grown in Japan.

Maru Nomi (u-gouges) and Soai Nomi (chisels) are designed specifically for cutting cherry blocks used in Moku Hanga and are excellent for clearing non-image areas with speed and efficiency. While these tools resemble sculptural chisels, their blade geometry and bevel angle are fashioned to perform exacting maneuvers on the flat, horizontal surface of a printing block.

Maru and Soai Nomi are the only tools traditionally used with a *kizuchi* (wooden mallet). The metal ring at the base of the tool preserves the handle when it is tapped with a mallet. They measure approximately 21cm (8¼") in length.

Kento Nomi is a specialized tool designed to make *kento* (registration marks) by hand. In the days of Ukiyo-e printmaking, this was the only tool used by the printer instead of the carver. The length is approximately 16.7cm (6").

Tosai's Seven Tool Set **SAVE 5%**

Futatsu Wari Moku Hanga To:
9mm Komasaki
6mm Komasaki
3mm Komasaki (u-gouge)
6mm Aisuki (chisel)
6mm Hangi To (knife)
Josei Moku Hanga To:
15mm Hira To (chisel)
18mm Maru To (u-gouge)

This combination of large and small hand-forged professional quality tools chosen by Moku Hanga teacher and artist Richard Steiner of Kyoto, Japan is an excellent foundation set for anyone serious about woodblock printmaking. Includes a canvas tool carrier to protect the tools. No substitutions on tool sizes or shapes. Available with either a left- or a right-handed Hangi To (knife).

Tosai's Seven Tool Set

C2894R	Right-Handed	\$437.95	\$416.05
C2894L	Left-Handed	\$437.95	\$416.05

Professional Six Tool Set **SAVE 5%**

Futatsu Wari Moku Hanga To:
1.5mm Komasaki
3.0mm Komasaki
6.0mm Komasaki
4.5mm Aisuki
3.0mm Sankaku To
4.5mm Hangi To

The professional quality Futatsu Wari hand-forged tools in this set are all of the basic tools you need for carving smaller blocks or details on larger blocks. Available with either a left- or right-handed Hangi To (knife). Packaged in a metal box to protect the tools.

No substitutions on tool sizes or shapes.

Professional Six Tool Set

C2892R	Right-Handed	\$323.20	\$307.05
C2892L	Left-Handed	\$323.20	\$307.05

Kizuchi

wood mallet

Only use with tools protected with a metal ring at the base of the handle, such as Nomi tools. Do not use with Futatsu Wari, Josei, Namisei or Aogami tools.

Hand-crafted from *kashi* (Japanese oak) these wooden mallets are used to tap metal-ringed Nomi (chisels on the left) through the wood. The Deluxe Mallet is heavier and more finely crafted. It includes a wedge which can be driven further into the handle to tighten the head should it loosen with use.

width x diameter x length

M4012	Deluxe, 4" x 1.75" x 14"	\$47.50
M4021	Standard, large, 5.5" x 1.8" x 13.25"	\$23.70
M4022	Standard, small, 4" x 1.4" x 11.75"	\$16.95

Deluxe and Standard Mallets

Josei Moku Hanga To

superior quality woodblock carving tools

Josei Moku Hanga To are hand-made using the same techniques as our Futatsu Wari tools. The blades are hand-forged, high-carbon steel laminated to wrought iron and are the same 8cm (3 1/8") length as their professional counterparts. The differences come from their intended purposes. The bevel angle on Josei and Namisei tools can be changed to perform a wide range of carving techniques including three-dimensional work and high relief. Like the Futatsu Wari tools, the craftsmen have given our tools a shallow bevel angle intended for carving wood that is resting on a horizontal surface.

Josei tools also come in the widest range of blade design and sizes.

The long handles of the Josei tools are made of *honoki* (silver magnolia) which can be shortened to suit different carving practices. The blade geometry of these tools is slightly different from Futatsu Wari tools to reflect their intended use in a variety of applications. The shape of the u-gouge is more shallow and the chisel is square at the tip, compared to the deeper shape of the u-gouge and the rounded bull-nose chisel blade on the Futatsu Wari tools.

A Josei tool's usable blade extends well into the handle, and as the tool is sharpened over its lifetime it will become shorter. The handle can then be whittled down to expose more usable blade, the same way a pencil is sharpened.

Many carvers cut down the handles of Josei and Namisei tools so they fit comfortably in the hand; see the facing page for instructions.

Total length is approximately 21 cm (8 1/4"). Made for hand carving only, not for use with a mallet which will damage the handle.

bent neck u-gouge, 1.5mm to 24mm

Magari Hira To
bent neck chisel, 1.5mm to 24mm

Ryo Ba
double edged knife or chisel, 3.0mm to 18.0mm

Namisei Moku Hanga To

standard quality woodblock carving tools

Namisei tools are indistinguishable from Josei Moku Hanga To in many ways; the handle design is identical, they are made of high-carbon steel forge-welded to wrought iron, and the blade geometry is virtually identical. The difference is the steel in Namisei tools is machine-forged instead of hand-forged. Namisei tools are also marked with a "C" at the base of the handle to distinguish them from their Josei counterparts. Namisei tools have an 8cm (3 1/8") usable blade mounted in their handles, which can be sharpened many times before the handle needs to be whittled down to expose more usable blade.

Total length is approximately 21cm (8 1/4"). Made for hand carving only, not for use with a mallet which will damage the handle.

Custom Fit the Tools to Your Hand

Many carvers cut down the long handles on Josei, Namisei and Aogami Moku Hanga To so the tools fit comfortably in their hand. Measure from the tip of your longest finger to the web between the index finger and thumb. Cut the handle so the whole tool, from the tip of the blade to the end of the handle, is this length.

Michihamono Japanese Carving Tools

Aogami Moku Hanga To

Aogami Moku Hanga To

standard quality woodblock carving tools

McClain's has historically carried tools from only one group of Japanese craftspeople, *Togituna*, which were also known as *Shimizu* tools (pages 4 - 7). We are excited to offer our customers another line of carving tools from Michihamono. These are their "cutlery steel carving knives" which we are calling *Aogami Moku Hanga To*. They are very good quality tools for students and experienced printmakers alike. In Japan these versatile carving tools are used by relief carvers, sculptors, and furniture makers as well as woodblock carvers.

Aogami Moku Hanga To blades are made by forge-welding hard steel (Yasuki #2 Blue steel) to soft iron (mild steel). After forging, the blades are shaped and sharpened by hand, as are all of the Japanese tools we carry. This forge-welding process provides Aogami Moku Hanga To with a keen cutting edge that can easily be re-sharpened. The long 8cm (3 1/8") blade ensures that the tool can be sharpened many times. When the blade gets shorter the handle can simply be whittled down to expose more usable blade, the same way one would sharpen a pencil.

The handles of the tools are made of *hinoki* (Japanese cypress) and are manufactured in two parts to ensure the blades are mounted straight. The oval shape of the handles is comfortable to hold and helps the carver find the correct position for cutting. They are also less apt to roll off the table. The blades have an anti-rust coating of shellac, so if you live in a rust-prone area like Hawaii or Florida they may be a good choice for you. The coating can easily be removed by honing or with a solvent, but it will also be gradually polished from the tip of the blade through the carving process.

Aogami Hira To come with a bull-nose shape similar to our *FutatsuWari Aisuki* (professional bull-nose chisel). The exception is the 15.0mm Aogami Hira To which is kept straight so it can be used to carve Kento registration marks. The total length of these tools is about 8 inches. Made for hand-carving only, not for use with a mallet. Many artists cut down the handles so the tools fit comfortably in their hand (see page 9).

NT Stencil Cutter

Designed for cutting paper stencils and other delicate work, some carvers prefer Stencil Cutters instead of knives for carving blocks. The cutter comes with ten blades, five at 45° and five at 30° angles. Imported from Japan.

Top: 45° blade
Bottom: 30° blade

C2840	NT Stencil Cutter Set	\$17.95
C2841	45° replacement blades, 40/box	\$6.95
C2842	30° replacement blades, 40/box	\$6.95

NT Utility Knife

Pack of 50 Replacement Blades

Cut through thick stacks of paper with this heavy-duty utility knife. Use the screw-stopper knob to expose more blade and then hold it firmly in place. The blades are scored so when a new edge is needed, use the safe and handy blade snapper to expose a fresh edge.

C2843	NT Utility Knife with 3 replacement blades and blade snapper	\$14.95
C2844	Replacement blades, 50/box	\$38.95

Canvas Tool Carrier

These carriers hold tools and/or brushes in twenty pockets, ten on each side. The large size is especially useful for carrying long handled tools and chisels. The small carrier holds short-handled tools. Made in Japan.

C3900 (\$116.53) **\$110.70**

#4 Angle Tint, #2 Elliptic Tint, #54 Round Graver, #40 Flat Graver, #46 Flat Graver, #4 Lozenge Burin

Leather Engraver's Sandbags

Blocks are traditionally carved holding the tool steady and moving the block under the tool. Place the block on a stack of Engraver's Sandbags to boost it up for comfortable carving and easy movement.

C3000 5.5" diameter **\$24.25**

Stone not included, see page 11

Crocker Sharpener

A precision jig with adjustments for both pitch and angle, the Crocker Sharpener holds tools firmly in position on the stone. The result is razor-sharp edges and a single bevel on the face of the engraving tool blade, something that is very difficult to achieve with hand sharpening.

C3500 **\$68.40**

Engraving Tools

These tools are designed for carving end-grain wood and alternative hard substrates like Polystyrene, Corian and Sintra. They do not work on softer plank wood, plywood or linoleum. For those materials, use the carving tools on pages 4-8.

The higher the size number, the broader the tip on the tool and the wider the mark the tool makes, assuming it is made to the same depth. Engraving tools come from the manufacturer "factory sharp" and need to be sharpened before they will carve their best. A jig called a Crocker Sharpener (below) is highly recommended for putting the sharpest edge possible on these tools.

Sharpening

Honing Toishi:Water Sharpening Stones Oil Stones Magnifier

Honing Block and Honing Compound

A few strokes on leather polishes the steel, keeping your tools in top shape and carving smoothly, without any danger of changing the shape of the bevel. Made of leather glued to a wood base. Honing Compound rubbed into the leather helps polish the blade fast.

Highly recommended.

S3430	Cow Hide Honing Block, 4" x 6"	\$13.65
S3425	Honing Compound, 5" long	\$11.30

Nagura Stone

A soft, man-made chalk stone. Rub the soft Nagura Stone on any ceramic Japanese sharpening stone to create a creamy, lubricating paste that improves sharpening action and gives a high polish to the blade.

S3800	Nagura Stone, 6.5 x 3.4 x 2cm (2 1/2" x 1 15/16" x 9/16" 2000 grit	\$33.10
--------------	--	----------------

Pocket Loupe

A magnifier or loupe is essential for examining blade tips while sharpening tools. The Pocket Loupe has two lenses that are 1.25" across. The power of each lens is 5 or 10 when they are stacked together. The lenses slip into their own protective case.

E1029	Pocket Loupe	\$16.95
--------------	--------------	----------------

Ceramic Toishi:Water Stones

The grit of a man-made ceramic stone is very uniform all the way through the stone. Ceramic stones put an edge on blades very quickly.

Flat Ceramic Toishi

Flat Ceramic stones come in three grits: *shiageto* (fine, on the left in the photo), *chudo* (medium, in the middle), and *arato* (coarse, on the right). Use the *shiageto* stone regularly to keep tools in top condition and the *chudo* stone occasionally when the tool is noticeably dull. The *arato* stone is for grinding out nicks.

Lubricate with water, never oil.

S3210	Shiageto (fine: 6000 grit) 2.5" x 7.25"	\$62.30
S3211	Chudo (medium: 1000 grit) 2" x 6"	\$32.35
S3212	Arato (coarse: 240 grit) 2" x 8.25"	\$38.45

Molded Ceramic Toishi

Pre-formed grooves are made for sharpening u-gouges. The separate slipstone (at top of photo) removes the burr that will form inside u-gouges after the bevel side has been sharpened with a couple of strokes. Do not sharpen the inside face of your tool with the slipstone; this will create a second bevel and the tool will not carve well. The back of the stone can be used as a flat stone to sharpen any tool shape.

Lubricate with water, never oil.

S3421	Molded, Shiageto (fine: 4000 grit) 2.5" x 4.25"	\$51.05
S3422	Molded, Chudo (medium: 1000 grit) 2.5" x 4.25"	\$43.90

Ceramic Slipstones

Slipstones are shaped for removing the burr that forms inside v-gouges or u-gouges after the bevel has been sharpened. Do not sharpen the inside face of your tool with the slipstone; this will create a second bevel and the tool will not carve well. They are medium grit and about four inches long. Lubricate with oil.

S3631	Prism, 6 mm	\$20.15
S3636	Cylinder, 6 mm	\$25.90
S3639	Cylinder, 8.0 mm	\$34.95
S3645	Set of 3 Save 5%	\$81.00 \$76.95

Oil Stones

Recommended for sharpening engraving tools. The 4" round India Combination Stone has a coarse 150 grit side and a fine 400 grit side. To maintain the edge or give the tool face a polished, mirrorlike finish, use the 3" hard 1000+ grit Arkansas Natural Stone. Sharpening Stone Oil lubricates and flushes away dislodged abrasive chips. 4.5 fl oz can.

S3450	India Combination Stone	\$35.25
S3453	Hard Arkansas Natural Stone	\$39.60
S3455	Sharpening Stone Oil (UPS ground shipping, contiguous U.S. only)	\$9.05

Professional tool sharpening is available. For information see page 30, call us, or visit imcclains.com/profservices.html for a list of services in Japan and the U.S.

Drawing and Image Transfer

Red Double-Sided Carbon Paper Polyfilm Inkjet Transfer Paper Watercolor Pencils Cutting Mats

Red Double-Sided Carbon Paper

Carbon paper is often used to trace drawings onto the block. This red carbon paper is so juicy that it can be used over and over again. Imported from Japan.

E4510	9" x 12.5" pack of 10	\$16.75
E4511	9" x 12.5" pack of 100 Save 5%	\$159.00

Polyfilm Tracing Sheet

Trace your drawing onto the matte side with a pencil or pen. Flip the Polyfilm over, place it shiny side up on carbon paper and trace the image onto the block. Polyfilm is waterproof and will not tear.

P7035	18" x 24" pack of 10	\$23.45
P7036	18" x 24" pack of 100 Save 5%	\$222.75

Inkjet Transfer Paper

Images printed from an inkjet printer onto this double sided paper will transfer cleanly to absorbent surfaces like wood, linoleum or paper. It does not work on hard, non-porous surfaces like Gomuban.

E4515	8.5" x 11" pack of 10	\$6.20
E4516	12" x 15" pack of 10	\$10.45

Niji Watercolor Pencils

Useful for planning out color ideas for your image. Moku Hanga printmakers making multi-colored prints often find it useful to make color separations, or a drawing of each color they will be printing, before transferring each of those color areas to a separate block.

Choose from a wide range of colors and values with the 36 colors included in this set of watercolor pencils. Use dry or add water for even coverage and blending.

E4517	Niji Watercolor Pencils, Set of 36	\$29.95
-------	------------------------------------	---------

Self Healing Cutting Mats

These high quality cutting mats come with one green and one black side. Both sides have grid lines to help you cut accurately. The mats are very durable and 3mm or a little less than 1/8" thick. The outer layers, printed with grid lines, are semi-soft vinyl. The inner layer is harder and provides the self-sealing qualities. Designed to be used with rotary or Exacto® blades.

Professional Japanese

Mizu Bake

water brush

This dense brush holds a great deal of water, so it is fast and easy to dampen paper or apply washes. Unlike wood, the synthetic handle will not split. The brush is made with very dense, high quality Chinese sheep's hair.

B4480	15 cm (5.9" wide x 6¾" long)	\$90.15
B4481	18 cm (7.1" wide x 6¾" long)	\$116.30
B4482	21 cm (8.3" wide x 6¾" long)	\$153.05

Maru Bake

round cornered printing brush

These traditional Japanese printmaking brushes are crafted from thick, black horse tail hair set into a wooden back. To prevent streaks in the ink, the bristles must be shaped and split by singeing and then rubbing them on a rough surface (see Dragon Skin, below). Complete instructions are available in the Learning Center at imclains.com.

B4211	#1, 4.0 cm x 5.5 cm (1.6" x 2.2")	\$48.20
B4212	#2, 4.9 cm x 6.2 cm (1.9" x 2.4")	\$50.60
B4213	#3, 5.2 cm x 7.6 cm (2" x 3")	\$62.00
B4214	#4, 6.0 cm x 9.1 cm (2.4" x 3.6")	\$87.80
B4215	#5, 6.0 cm x 10.7 cm (2.4" x 4.2")	\$99.80

Dragon Skin

A substitute for the traditional shark skin, Dragon Skin is used to efficiently split and soften the tips of the stiff hairs on *Maru Bake* and *Hanga Bake* so the ink will spread out smoothly without streaks or lines. The silicon carbide sanding sheet is supported by a plywood base.

Water-based Ink

Holbein Paste Pigments Akua Liquid Pigment Bokuju Tosai's Gouache Set

Holbein Paste Pigments

Richard Steiner, who received his teacher name Tosai and license to teach Moku Hanga from his teacher Masahiko Tokumitsu, worked with Holbein in Japan to develop this line of pure paste pigments. The colors were chosen to resemble the palette used for 18th and 19th century Japanese Ukiyo-e prints.

Traditionally, Moku Hanga printmakers make their own colors by mixing dry pigments with water and a small amount of alcohol as a dispersant. However dust from handling dry pigments can cause health problems. Holbein Paste Pigments eliminate this concern while providing the same intense, concentrated colors that comes from mixing your own.

Holbein Paste Pigments contain pure color pigments suspended in a base of water, wetting agent and dispersant. Because each pigment requires a different ratio of base ingredients, the amount of pure pigment in each bottle ranges from 30% to 70%. They contain no fillers, binders (such as gum arabic) or toxic chemicals.

Very small amounts of Paste Pigments go a surprisingly long way. Mix a few drops into water until the desired tint is reached. Water also makes Paste Pigments more transparent.

Once Holbein Paste Pigments are completely dry, the ink is non-reversible. Store in air-tight containers and only mix as much as you need for the current project. Clean brushes immediately after printing. Holbein Paste Pigments are non-toxic and a labeled, approved product conforming to ASTM D-4236.

Color samples are approximate.

Akua Liquid Pigment

Developed for monotype printmaking, Akua Liquid Pigments work well for Moku Hanga, a printing technique that uses brushes to add ink to the block. Modified with Tack Thickener, Akua Liquid Pigments can also be applied with brayers.

Made with the highest quality, lightfast pigments, pure gum binders and honey. No chalk, fillers, polymers or resins are added to this heavily pigmented ink.

Modifiers can be used to change the ink for specific uses. Cleans up quickly with soap and water.

Bottles contain 4oz (119ml) of ink or modifier.

Akua Liquid Pigments are a labeled, approved product conforming to ASTM D 4236.

Brayers

Japanese Brayers Speedball Brayers Takach Brayers

Japanese Brayers

Ideal for relief printmaking, these sturdy, well-made brayers have a tough Nitrile rubber roller on a hard plastic core, held by a metal frame with a wooden handle. The brayers are made in Taiwan to Japanese specifications.

These 50 durometer, 45mm diameter rollers will roll out 5 1/2" of ink without a lap mark.

Clean with Gamsol when using traditional, oil-based inks like Gamblin; clean with Dawn dish washing liquid when using water-soluble inks like Caligo, or water-based inks like Akua Liquid Pigment. The rollers on the brayers can be removed easily with a Phillips screwdriver for cleaning and drying.

Long exposure to UV light will cause Nitrile rubber to crack, so store the brayers in a box or cupboard away from the sun or florescent lights.

Brayer (Roller Plus Handle)

50 dur.	width x diameter	
B4866	100 x 45 mm (3 13/16" x 1 3/4")	\$76.40
B4867	164 x 45 mm (6 7/16" x 1 3/4")	\$93.40
B4869	240 x 45 mm (9 1/2" x 1 3/4")	\$133.25

Speedball Soft Rubber Brayers

The roller is made from natural gum rubber with a ground finish, attached to a plastic core and held in a steel frame that will not warp as the brayer is being used. The round plastic handle fits comfortably in your hand.

The rollers are 40 durometer hardness and roll out almost 3 3/4" of ink without a lap mark. Use with linseed oil- or water-based inks. Soy oil may make this roller sticky; try dusting with cornstarch or talc after cleaning if this happens. Store away from UV light. Made in the U.S.

40 dur.	width x diameter	
B4792	2" x 1 3/16"	\$14.95
B4794	4" x 1 3/16"	\$18.75
B4796	6" x 1 3/16"	\$20.25

Takach Hand Brayers

These are the finest brayers available today. The roller is a blend of natural rubber and Buna Nitrite, which has a longer life span than other materials and maintains a consistent hardness. The rubber is wrapped on an aluminum roller core, then cured, ground and polished.

Self-lubricating bronze bushings are installed in the powder-coated brayer frame to ensure smooth operation. The metal frame forms a stand for the brayer. With larger sizes, try holding the handle upright, perpendicular to the printing block. The pressure from the weight of the brayer will help apply the ink with very little effort.

The 1 3/4" diameter rollers roll out 5 1/2" of ink and 2 1/2" diameter rollers roll out 7 3/4" of ink without a lap mark. 12" and 14" Jumbo Brayers have big 3 1/2" diameter rollers that roll out 11" of ink, providing an 11" x 12" or 11" x 14" square of ink without a lap mark.

The most versatile rubber hardness is 35 durometer. Most printmakers prefer them because their flexibility makes it easy to ink the block evenly and quickly. Hard 60 durometer brayers are preferred for rolling out light applications of ink, to avoid filling in fine details, or show wood grain.

Takach 4" and larger Hand Brayers are shipped directly from the manufacturer. The cost of shipping varies depending on weight and destination; average cost ranges from \$15 to \$30 for one brayer going by UPS Ground in the U.S. Please allow approximately two weeks for delivery.

35 dur. (medium)	60 dur. (hard)	width x diameter	
B4931	B4911	2" x 1 3/4" available from McClain's	\$79.00

Takach Specialty Brayers

Specialty Brayers are made with 35 durometer rubber wrapped on an aluminum core. They roll out 5 1/2" of ink without a lap mark. The roller is placed in a sturdy metal frame with a self-lubricating bearing.

Oil-based Ink

Gamblin Relief Ink Caligo Safe Wash Relief Ink

Gamblin Relief Ink

- Archival, lightfast pigments in pure burnt linseed plate oil
- No fillers or additives
- Lightfast pigments (Blue Wool Scale 6 or higher)
- High pigment load so a little goes a long way
- Rolls out easily and smoothly, great coverage
- Intense colors, brilliant undertones

While stiff enough to hold fine detail, this low tack, traditional ink is formulated to spread out smoothly and evenly on the block with little or no modification. The dense, saturated colors mean less ink is required to pull a quality print.

All of the pigments are lightfast and will not change or fade over time. A very small amount of cobalt dryer has been added to the ink so it will dry within 2-6 days. Clean up with Gamsol Odorless Mineral Spirits (page 29). Gamblin is the first American color house to be B-Corp certified. Made in Portland, Oregon.

Color samples are approximate.

Gamblin Textile Black Ink

After seven years of printing woodblocks on over 30,000 T-shirts, Drive-By Press in collaboration with Gamblin has perfected a rich, dark black, linseed oil-based ink formulated for even coverage, quick drying time and color fastness on cotton fabrics. Heat set after it is dry. Holds up to repeated washing.

K7740 Textile Black Ink, 1lb can **\$27.70**

Tom Huck's Outlaw Black Relief Ink

The official ink of Tom Huck and Evil Prints, Outlaw Black is crafted by Gamblin Artist's Colors in Portland, Oregon. Outlaw Black is a very stiff, cool-black linseed oil-based ink designed for printing finely detailed blocks.

K7742 Outlaw Black Relief Ink, 1lb can **\$27.70**

Gamsol Odorless Mineral Spirits

Most solvents are produced for the industrial paint industry where solvent strength and low cost take priority. Gamsol, available from Gamblin Artists Colors, is different. It comes from a family of solvents used in products that are expected to come into contact with the body, such as hand cleaners, cosmetics and food service equipment. Shipping restrictions apply for some states. For more information, see page 29.

K7498 33.8 fl oz (approximately 1 quart) **\$32.00**

K7499 128 fl oz (1 gallon) **\$79.95**

Ink Cans, Pack of Six

Store oil-based ink in these seamless aluminum metal cans to keep it fresh and ready to use. Cover ink with a skin paper and wrap electrical tape around the lid to make it air tight. 2.5" in diameter and 2" tall. Each 4oz can holds approximately 1/2 cup (118ml) of ink.

E5515 Ink Cans, Pack of Six **\$16.50**

K7799 Box of 500 27/8" Skin Papers **\$24.95**

Caligo Safe Wash Relief Ink

- Linseed oil base plus an emulsifier; cleans up with soap and water
- Lightfast pigments (Blue Wool Scale 6 or higher)
- Heavily pigmented so a little goes a long way
- Rolls out easily and smoothly, gives great coverage

Modify like any other linseed oil-based ink. Thin the ink with Caligo Oil, which contains the same emulsifier used in the Caligo Safe Wash colors. Thicken with Gamblin Magnesium Carbonate, use Gamblin Tack Reducer to reduce the tackiness of the ink so it releases easily, speed up drying time with Cranfield Wax Drier.

Skin Papers help keep ink in cans from skinning over. Replace the skin paper after removing ink and seal can with electrical tape.

Baren

Hon Baren Ball Bearing Baren Murasaki Baren Disk Baren Standard Quality Baren Takenokawa Tsubaki Abura

Premium Hon Baren

A *Hon Baren* is the ultimate tool for the serious Moku Hanga printmaker. The qualities of a *Hon Baren* are subtle, but once experienced these baren are clearly a superior printing tool. Each baren takes six months to a year of intense labor to create, requiring the skills of a true master craftsman.

The 8-*ko* (strand) baren is the most versatile and comes in three basic textures: coarse, for printing large areas on thick paper; medium (the most versatile) for general use especially on fine or medium paper; and fine, for printing delicate carving on thin paper. 12-*ko* and 16-*ko* baren are more expensive and designed for strong printing usually on heavy paper. All *Hon Baren* are 13cm (5³/₁₆") wide.

SPECIAL ORDER ONLY. At the exchange rate when this catalog was printed, prices start at around \$1,200. Please call or email for current prices. After you place your order, our price will not increase. If the exchange rate improves by the time your Baren arrives, we will pass the savings on to you.

A5801	13cm (5.13") 8 Ko Hon Baren, Coarse	special order
A5802	13cm (5.13") 8 Ko Hon Baren, Medium	special order
A5803	13cm (5.13") 8 Ko Hon Baren, Fine	special order

Ball Bearing Baren

These baren require only a minimal amount of pressure to pull a print, a definite plus if you print large editions or if you are suffering from arthritis or a repetitive stress injury to your hand or arm.

The metal plate holding the ball bearings sits on a cork disc with leather on the other side. The thick, twisted leather handle is very comfortable to hold. Cushioning keeps the ball bearings from rattling as the baren moves and the difference in price between cushioned and uncushioned is \$10.00.

Top:A5902, 378 ball bearings
Bottom:A5904, 612 ball bearings

612 Ball Bearing Baren approximate an 8-*ko* *Hon Baren* or a medium *Murasaki Baren*, and are designed for general printing, fine lines and printing detailed areas. 378 Ball Bearing Baren approximate a 16-*ko* *Hon Baren* or a coarse *Murasaki Baren*, and are designed for printing large, flat color areas. All Ball Bearing Baren are 14cm (5.5") wide; the metal disk holding the ball bearings is 12cm (4³/₄") wide.

The prices of special order baren is based on the exchange rate. Please call or email for the current price. After you place your order, the price we quote will not increase. Allow six to eight weeks for delivery of special order baren.

The prices of special order baren is based on the exchange rate. Please call or email for the current price. After you place your order, the price we quote will not increase. Allow six to eight weeks for delivery of special order baren.

A5901	378 ball bearings (top photo, for printing large areas)	special order
A5902	378 ball bearings, (for printing large areas, cushioned)	special order
A5903	612 ball bearings (bottom photo, most versatile)	special order
A5904	612 ball bearings (most versatile, cushioned)	\$322.50

Murasaki Baren

A more affordable version of the *Hon Baren*. It uses the same backing disc as the *Hon Baren* but the coil is hand-twisted from a hard, synthetic cord that easily transfers pressure to the block. Includes a sample of *Camellia Oil*.

A6025	12.0 cm soft: delicate detail, less apt to leave baren marks on paper	\$340.20
A6026	12.0 cm medium: all-around general use, thin or medium paper	\$264.60
A6027	12.0 cm coarse: large areas, thick paper	\$283.50

Disk Baren

This high tech plastic baren was designed by the famous Japanese printmaker and teacher Akira Kurosaki. The replaceable disk has many small bumps on the surface, simulating the points on a *Hon Baren* coiled pad, that apply pressure evenly across the paper as you print. No bamboo baren cover is used. Replace the disk when the bumps start to wear down. Comes with a sample of *Camellia Oil*, which is applied to the baren face so it will glide easily.

A6035	13cm (5 ³ / ₁₆ ") Disk Baren	\$47.25
A6035R	Replacement Disk	\$21.95

Medium Baren
paper coil

Large Baren
cotton twine coil

Standard Quality Baren

These baren are constructed with lacquered cardboard disks and bamboo sheath covers. Because of price, many printmakers start with a *Medium Baren*. However the stiffer cotton twine coil in the *Large Baren* transfers the pressure from your arm more efficiently so you can pull a better print with less work. A sample of *Camellia Oil* is included.

A6208	11.0 cm (4.3") Medium, twisted paper coil	\$15.00
A6209	13 cm (5 ³ / ₁₆ ") Large, synthetic twine coil	\$49.85

Takenokawa

bamboo sheath

Eventually the *barengawa* (bamboo sheath) on a baren will wear out and need to be replaced. Complete instructions for recovering baren can be found in the Learning Center on our website. We suggest buying more than one to have a backup in case the first try is not successful.

A6450 at least 13.5 cm x 50 cm (19.7" x 5.3") **\$6.55**

Tsubaki Abura

Camellia japonica, camellia oil

Just a drop of camellia oil applied to the sheath covering a baren keeps it supple and prolongs its life. Our Camellia Oil is cosmetic grade, so it is also good for your skin.

Camellia Oil is also used to protect steel tool blades from rust. Apply a small amount to the blade after sharpening on water stones or before storing tools for a long time.

A6660 2.0 fl oz bottle **\$15.50**

Ategami

back paper

This thin, waterproof paper creates a barrier between the baren and the damp printing paper, protecting them from one another and allowing the baren to move freely as you print.

A6551 11.75" x 16' (half roll) **\$23.70**

A6550 11.75" x 32' (full roll) **\$47.40**

"L" on left

"L" on right

Registration Boards

Eliminates the need to carve *kento* (registration marks) into the wood blocks themselves. Carve the marks into the "L" or use tape to make temporary registration marks. Place the inked block firmly into the corner of the "L" and use the marks to accurately position the printing paper on the block. Works best with blocks up to 12" x 16" in size and 3/8" in height. Complete instructions can be found in the Learning Center at imcclains.com.

Available with the corner of the "L" on the left or right side. The right side is more commonly used but some people, lefties especially, prefer to use their left hand to put the paper into the corner kento.

If you would like a different size Registration Board, or a lower or taller "L," we will be happy to make it for you. Please allow up to one week for us to make custom Registration Boards.

E4900L "L" on left, 13" x 17" base board **\$25.25**

E4900R "L" on right, 13" x 17" base board **\$25.25**

CUSTOM SIZE

E4901 Custom Registration Board **\$0.13 per sq. inch**

Spot Printer

The print has gone through the press, you lift a corner to see how it looks and one small area needs a bit more ink. Out comes your handy Spot Printer and with a little rubbing, the ink transfers and the print is saved! The Spot Printer can also be used to pull prints and while it takes time, it is easier on your hand compared to holding a spoon.

Washi

Handmade Japanese Paper: **Nishinouchi Kizuki Hanga Kizuki Hoshō Echizen Torinoko Masa Dosa Yamashiro Kitakata Hoshō**

Quantity Discount Different printing papers can be combined to qualify for quantity discounts.

Shipping Large sheets of paper are shipped rolled. If you prefer to have paper shipped flat please let us know when you place your order. Carriers base their charges on the height, length and weight of the box, so consider ordering as much paper as possible to spread out that higher shipping cost.

Paper Swatches

Nothing compares to seeing and feeling the paper itself. Our Paper Swatches let you do this before investing in full sheets. Also useful in identifying mystery papers in your studio. Includes all of the Japanese and western papers we carry.

P6800 3" x 5" swatches plus detailed descriptions of each paper and their suggested uses. **\$18.30**

Group A Washi

This group includes our finest printmaking papers intended for Moku Hanga. They are all handmade with deckle edges on all four sides. The papers are medium to heavy weight and strong enough to easily withstand multiple printings from multiple blocks.

Nishinouchi

Kizuki Hanga

Kizuki Hoshō

Echizen Kozo Natural

Echizen Kozo White

Nishinouchi

A great paper with a subtle brushed texture that accepts ink well, Nishinouchi is surprisingly strong and able to withstand repeated printings from multiple blocks. A good weight for book arts. This year the fiber content was changed so the mill could continue making the paper for the same price. We have tested it and see no difference in performance.

Sized Handmade (4 deckle edges) 50% Northern Kozo + 50% acid free pulp

	color	dimensions	weight	1-24	25-49	50+
P6801	Natural	29.25" x 41.75"	60gm/sqM	\$22.85/sheet	\$21.70/sheet	\$20.55/sheet

Kizuki Hanga

An exceptionally low price for 100% Kozo paper of this weight and size. Ideal for multiple block prints, Kizuki Hanga's weight and body make it easy to lay full size dampened sheets on the block.

Sized Handmade (4 deckle edges) 100% Kozo

	color	dimensions	weight	1-24	25-49	50+
P6802	Off-White	27" x 40.5"	135gm/sqM	\$52.35/sheet	\$49.75/sheet	\$47.10/sheet

Kizuki Hoshō

The Echizen district's famous printmaking Washi, created by Living National Treasure Ichibei Iwano. 100% Kozo of the highest grade. Smooth surface; accepts water-based ink extremely well.

Unsize Handmade (4 deckle edges) 100% Kozo

	color	dimensions	weight	1-24	25-49	50+
P6803	Natural	18" x 21.5"	75gm/sqM	\$64.25/sheet	\$61.05/sheet	\$57.85/sheet

Echizen Kozo

A fairly soft, dense, medium-weight paper, very smooth on one side. Imparts a bright look to water-based ink. Designed for moku hanga, works well for all relief printmaking techniques.

Sized Handmade (4 deckle edges) 100% Kozo

	color	dimensions	weight	1-24	25-49	50+
P6808	Natural	26" x 38"	55gm/sqM	\$53.45/sheet	\$50.80/sheet	\$48.10/sheet
P6809	White	26" x 38"	55gm/sqM	\$53.45/sheet	\$50.80/sheet	\$48.10/sheet

Group B Washi

These versatile, sized papers are very good quality. They are either machine made or handmade, from a mixture of fiber and buffered, acid free wood pulp. Torinoko is strong enough to handle multi-block printing.

Torinoko White

Torinoko Dark Cream

Torinoko

Very smooth and uniform on one side and fairly rough on the other, this heavyweight, machine made paper is sized for printing with water-based ink. Works well for gradation printing.

Sized Machine made (no deckles) 70% Mitsumata and 30% pulp

	color	dimensions	weight	1-24	25-49	50+
P6853	White	25" x 37"	145gm/sqM	\$19.55/sheet	\$18.55/sheet	\$17.60/sheet
P6854	Dark Cream	25" x 37"	150gm/sqM	\$19.55/sheet	\$18.55/sheet	\$17.60/sheet

Torinoko Lt Wt

Torinoko, Light Weight

A uniform, fine-fibered handmade paper, translucent and soft to the touch. A lovely paper for book arts as well as printmaking techniques.

Sized Handmade (4 deckle edges) 70% Gampi and 30% Mitsumata

	color	dimensions	weight	1-24	25-49	50+
P6855	Cream	24" x 35.75"	50gm/sqM	\$14.45/sheet	\$13.70/sheet	\$13.00/sheet

Group C Washi

This is a group of good quality printmaking paper at low prices. These papers are sized for printing with water-based ink. They contain a higher percentage of wood pulp than Group A or B papers, ranging from pH 6.5 to 7.5 (pH 7 is neutral).

Koze-shi

Koze-shi

The surface of this paper is very smooth for even coverage when printing with water-based ink. A good choice for etching and chine collé as well. The paper fibers create a subtle swirling pattern. No laid lines.

Inner Sizing (added to vat when paper is formed) Machine made (no deckle) Koze and acid free sulphite pulp

	color	dimensions	weight	1-24	25-49	50+
P6908	Off-White	25" x 38"	36.5 gm/sqM	\$8.55/sheet	\$8.10/sheet	\$7.70/sheet

Shin Torinoko White

Shin Torinoko

These machine made papers are the most economical sized printmaking paper that we carry. Very smooth on one side, with a felt-like quality on the other. This paper holds up well with Moku Hanga and multiple block printmaking as well as western style techniques.

Sized Machine made (no deckle) 50% Manila linen (flax), 50% acid free pine pulp

	color	dimensions	weight	1-24	25-49	50+
P6905	White	24.75" x 37.5"	125gm/sqM	\$6.25/sheet	\$5.95/sheet	\$5.60/sheet
P6907	Cream	24.75" x 37.5"	120gm/sqM	\$6.25/sheet	\$5.95/sheet	\$5.60/sheet

Shin Torinoko Cream

Masa Dosa

Masa Dosa

Crisp, bright white handmade paper with very subtle laid lines. Accepts ink well. It is thick and tough enough to print multiple blocks.

Sized Handmade (4 deckle edges) Koze and acid free pine pulp

	color	dimensions	weight	1-24	25-49	50+
P6903	White	22" x 32"	90gm/sqM	\$10.45/sheet	\$9.95/sheet	\$9.40/sheet

Pansion Light Natural

Pansion Natural

Pansion

Used at the MI-LAB Artist in Residence Moku Hanga program in Japan: endeavor.or.jp/mi-lab. Pansion accepts ink easily. Use for digital printing, Moku Hanga and western relief styles. Smooth, slightly iridescent surface. Light Natural is very uniform, Natural is more rustic with bits of fiber.

Internally sized Machine Made Koze and acid free pine pulp

	color	dimensions	weight	1-24	25-49	50+
P6909	Light Natural	25" x 38"	80gm/sqM	\$5.95/sheet	\$5.75/sheet	\$5.45/sheet
P6910	Natural	25" x 38"	64gm/sqM	\$5.95/sheet	\$5.75/sheet	\$5.45/sheet

Group D Washi

In this case, "D" stands for Diversity! These papers are mostly unsized and contain diverse fiber content. They range from pH 6.5 to 7.5 (pH 7 is neutral). Suitable for a variety of uses, including book arts and conservation as well as printmaking.

Yamashiro

Yamashiro

A fine, lightweight paper with very subtle laid lines. Intended for use as a mending tissue, Yamashiro also works well transferring a printed key block image to multiple blocks.

Sized Probably machine made (no deckle) Fiber content unknown, probably Koze

	color	dimensions	weight	1-24	25-49	50+
P6952	Natural	25" x 37"	25gm/sqM	\$8.35/sheet	\$7.95/sheet	\$7.50/sheet

Kitakata Natural

Kitakata

This strong, smooth paper is excellent for relief printmaking, including wood engraving. Natural is a warm shade; green is a cool, light, greyish green.

Unsized Handmade (4 deckle edges) 90% Philippine Gampi, 10% acid free wood pulp

	color	dimensions	weight	1-24	25-49	50+
P6957	Green	16" x 20"	33gm/sqM	\$4.95/sheet	\$4.70/sheet	\$4.45/sheet
P6953	Natural	16" x 20"	33gm/sqM	\$4.95/sheet	\$4.70/sheet	\$4.45/sheet

Kitakata Green

Mulberry

Hosho Professional

Hosho Student

Mulberry

A fine textured, soft, naturally warm colored paper with very subtle laid lines. Mulberry is long fibered and strong. Made by Hiroko Tanino, who has been recognized by UNESCO for her preservation and continuation of traditional papermaking techniques.

	Unsize		Handmade (4 deckle edges)		30% Thai Kozo, 70% acid free sulfite pulp		
	color	dimensions	weight		1-24	25-49	50+
P6954	Warm White	24" x 33.5"	45gm/sqM		\$11.50/sheet	\$10.45/sheet	\$9.90/sheet

Hosho, Professional and Student

A very white handmade paper with subtle laid lines, known for its thick, fluffy texture. Hosho is very absorbent. Hosho Student has a slightly softer surface and a bit more texture than Hosho Professional.

	Unsize		Handmade (4 deckle edges)		100% acid-free sulfite pulp		
	color	dimensions	weight		1-24	25-49	50+
P7005	Pro: White	19" x 24"	85gm/sqM		\$7.75/sheet	\$7.10/sheet	\$6.70/sheet
P7006	Student: White	18" x 22"	95gm/sqM		\$5.20/sheet	\$4.40/sheet	\$4.20/sheet

Washi Cards

Handmade from 100% Kozo with four deckle edges, these elegant cards are perfect for creating works of art to sell or send to friends. The cards are sized, so they will accept either water or oil-based inks equally well. Packaged in sets of five cards or envelopes.

	number and color	dimensions	
P7200	5 Postcards, Light Natural	4" x 6"	\$17.35
P7202	5 Foldable Cards, Light Ntl	6" x 8"	\$21.95
P7210	5 Envelopes	4.5" x 6.5"	\$12.45

Western Printmaking Paper

High quality Western paper made from cotton linter. They are heavy, thick, opaque and designed to be printed on a press.

Arches 88

Rives BFK

Stonehenge

Arches 88

A bright white waterleaf paper with a smooth surface on both sides, Arches 88 is ideal for silk screen, lithography, intaglio and monotype.

	Unsize		Mould made (2 deckle edges)		100% cotton		
	color	dimensions	weight		1-24	25-49	50+
P7008	White	22" x 30"	300gm/sqM		\$9.30	\$8.85	\$8.40

Rives BFK

A classic, bright white printmaking paper with a slightly textured surface, Rives BFK is used for western printmaking techniques.

	Internally Sized		Mould made (2 natural deckles, 2 torn deckles)		100% cotton		
	color	dimensions	weight		1-24	25-49	50+
P7012	White	22" x 30"	280gm/sqM		\$9.05	\$8.60	\$8.15

Stonehenge

Affordable, versatile, archival paper. Dimensionally stable for perfect registration. Smooth surface with a slight tooth. Use for drawing and western printmaking techniques. Made in the U.S.A.

	Internally Sized		Machine made (2 deckles edges)		100% cotton		
	color	dimensions	weight		1-24	25-49	50+

Stonehenge Printmaking Paper Pads

Made with the same 250gm/sqM, 100% cotton, archival Stonehenge printmaking paper found at the bottom of page 26. Smooth surface with a slight tooth. This heavy paper is made for use on a printing press.

Available in two sizes convenient for travel and making small prints.

(See also Stonehenge light-weight 137g/sqM drawing paper pads on page 12.)

P7013	9" x 12" White, 15 sheets	\$24.20
P7014	11" x 14" White, 15 sheets	\$33.30

Glassine

Our Glassine is acid free, neutral pH and approved for archival purposes. It is used to package and protect art work. Sheets are 24" x 36". Glassine paper is slick, grease resistant, has a high resistance to the passage of air, and is almost impervious to the passage of water vapor. Very smooth, semi-transparent.

P7020	1.0lb, approx. 25 sheets	\$34.40
P7025	3.5lb, approx 65 sheets	\$86.80
P7030	36" x 300' Roll	\$197.25

Newsprint

30# newsprint, smooth on both sides, takes ink very well. Not acid free. Good for proofing. Made from recycled paper. Sheets are approximately 18" x 24" give or take about a half inch. Sold by weight so the number of sheets may vary.

P7050	1.5 lb, approx. 50 sheets	\$6.55
P7055	3.0 lb, approx. 100 sheets	\$12.25

Please Note: Newsprint and Glassine cannot be combined with printmaking papers for quantity discounts. Shipped rolled.

Dosa Kit

This kit includes everything you need to make one gallon of *dosa* (paper sizing): 8oz of the highest grade rabbit skin glue, very finely ground so it will dissolve in water quickly; 4oz of alum; and detailed instructions. Animal skin glue is also traditionally used as a fixative for dry pigments.

E5800	Dosa Kit + instructions	\$15.15
E5810	Dry Animal Skin Glue, 8 oz (20 Tbsp.)	\$10.25

Journey to Hokusai

with Tom Killion, filmed by Chikara Motomura

A successful, western printmaker deeply touched by the art of Hokusai, Tom journeys to Kyoto to learn Moku Hanga from Kenji Takenaka, a 5th generation printmaker. This film also examines the source of aesthetics found in Japanese art, craft and lifestyle.

R2640 1 hour 30 minutes, view trailer at vimeo.com/355736854 **\$29.00**

Becoming Made

with Mary Brodbeck

A beautiful documentary about the creative process of Moku Hanga. Includes interviews on the value of creative work. For those hoping to be inspired, or wishing to inspire others, in art and in this printmaking process.

R2660 35 minutes, view trailer at vimeo.com/112420838 **\$18.00**

Japanese Woodcut Workshop **NEW FORMAT! A Course in Four Sections NEW LOWER PRICE!**

with Izumi Kuroiwa

A workshop suitable for beginners plus a refresher course that you can watch any time you like. Engaging and inspiring. Available as a download through our website, imclains.com/catalog/dvds.

R2501 75 minutes, bookmarked **\$19.95**

Painterly Printmaking with Monotype

with Julia & Gail Ayers

Using the PinPress monotype roller and nontoxic Akua inks, Gail and Julia use brushes, brayers, Q-tips, fingertips, Needle Applicators and lint free cloths to create their images.

R2620 104 minutes **\$39.95**

Safer Printmaking with Akua Water-based Inks

with Susan Rostow, William Jung and friends

In addition to information on color mixing, modifiers, and applicators, learn how to create reductive, additive and viscosity monotypes; Akua Intaglio prints; four-process color photo-intaglio prints; and more.

R2601 53 minutes, bookmarked **\$29.00**

Between Ink And Paper

with Catherine Kernan

Expands on the basic information in *Safer Printmaking with Akua Water-based Inks* with exciting new ideas and techniques. Using Akua Liquid Pigment and Akua Intaglio inks in an inventive woodcut and monoprint process, Kernan uses offsets to plastic, viscosity rolls, and pulls ink from one block to another to create new images.

R2630 85 minutes **\$47.40**

Books

Making Japanese Woodblock Prints

by Laura Boswell

Excellent color photos and detailed step-by-step instructions, from designing multi-block images to finished print. Includes info on carving kento registration and a great troubleshooting guide.

R2524 96pp, soft, 9.5" x 6.8" **\$22.95**

Mokuhanga Fundamentals by Terry McKenna

Detailed step-by-step instructions on the basic techniques for designing, carving and printing, guide you from start to finish. The style is conversational and the book is lavishly illustrated with excellent, clear photos and drawings of every step.

R2526 159pp, soft, 8.25" x 11.7" **\$39.95**

Japanese Woodblock Print Workshop

A Modern Guide to the Ancient Art of Mokuhanga

by April Vollmer

A how-to handbook with illustrated explanations of technique and tips on combining moku hanga with other printmaking styles. Includes information on Japanese paper, tools, materials, and resources. Intended to make this water-based technique accessible to contemporary artists.

R2525 256pp, hard, 8.25" x 10.25" **\$29.95**

Creative Print by Terry McKenna

Take Mokuhanga to the next step! This unique book takes you to new levels of creative design, transfer, carving and printing to give your work enhanced complexity and visual interest. For artists working to build their abilities and produce exciting, contemporary work.

R2527 250pp, soft, 8.25" x 11.7" **\$48.50**

Japanese Woodblock Printing

by Rebecca Salter

From a brief history to a discussion of materials and their use and care, followed by a thorough description of methods and techniques, this book is full of ideas, tips and information. Full color illustrations.

R2520 128pp, soft, 6" x 9.5" **\$21.95**

Mokuhanga for Children by Terry McKenna

Introduce Moku Hanga to young students. Moku Hanga is a safe, non-toxic printmaking technique that requires only a few basic supplies. Create prints without carving tools, use stencils and jigsaw blocks, make single color and multiple color prints. Inspire students from 6 through 16.

R2543 212pp, soft cover, 11.75" x 8.25" **\$34.50**

Moku Hanga Primer: Making Woodblock Prints

by Robert McClain

Written in an easy, conversational style by the founder of McClain's, this description of Japanese woodblock printing materials and techniques is concise and informative. Illustrated with drawings by the author.

R2504 9pp, soft, 8.5" x 11"

\$9.95

Mokuhanga: Manual Ilustrado de Xilografía Japonesa

by Fabiola Gil Alares

Written in Spanish by a long-time teacher and Moku Hanga artist who studied extensively in England and Japan, this step-by-step comprehensive guide to Moku Hanga is illustrated with more than 200 color pages and includes QR codes to practical videos.

Woodblock Prints by Richard Steiner

A collection of 71 prints from internationally known Moku Hanga artist and teacher, Richard Steiner, from his exhibit, "50 Years of Woodblock Printmaking," plus 11 bonus prints. The prints from his very personal journey range from playful to serious and are always honestly original. Signed by the artist.

R2541 70pp, soft, 11.75" x 8.25"

\$36.25

McClain's Swag

McClain's Big Canvas Tote

Made with heavyweight 12oz canvas, with two-ply handles and a reinforced bottom, this sturdy tote is made to carry heavy loads.

A zip-top secures the contents in the main bag while a front pocket holds small items. This big 16" x 20" x 6" tote holds 12" x 16" blocks and still zips up, or it can hold up to 16" x 20" blocks if you don't mind them sticking out the top.

E2017 16" x 20" x 6" **\$28.95**
(40.6 x 50.8 x 15.24cm)

McClain's Lightweight Tote

Just right for a few books or art supplies. Made of light-weight cotton sheeting with reinforced straps. Fill with small supplies and tuck into your Big Canvas Tote!

E2016 12.5" tall x 12" wide **\$6.95**
(31.75 x 30.5cm)

McClain's Apron

Made from sturdy, black, 65/35 polyester/cotton with McClain's logo embroidered in red and light gray on the front. These aprons have extra long 34" ties and an easily adjustable neck strap that stays where you put it. The apron has two large pockets and a pencil pocket. Wash and dry normally; will not shrink.

E2015 Apron: **\$29.50**
22.5" wide x 33.5" long

McClain's Logo Mug

Of course you use kento! But if you're not sure what the heck we are talking about, this mug comes with detailed instructions for using traditional Japanese kento registration, an amazingly simple, accurate way to register paper onto a block. Once you try it, you'll never use anything else. Now you are also in the know!

This classic ceramic mug holds tea, coffee, cocoa, root bear floats, whiskey, brushes, pencils, anything you like. Makes a great gift for any relief printmaker including yourself.

E2012 "When you know, you Kento" 11oz mug **\$9.95**

Safety and Clean Up

Ansell TouchNTuff® Nitrile Gloves

Gloves provide the best protection from ink and chemicals for your hands. Nitrile is non-allergenic and tougher than latex. These gloves are textured for better gripping and lightly powdered inside so they are easy to pull on and off.

E1020 Small, size 6 1/2 - 7, box of 100 (smaller hands) **\$38.25**

E1022 Large, size 8 1/2 - 9, box of 100 (fits most) **\$38.25**

E1024 Extra Large, size 9 1/2 - 10, box of 100 (big hands) **\$38.25**

Allway Scraper

The right tool for efficiently scraping ink off of glass slabs and other work surfaces. A scraper works much better than an ink knife, saving on towels and cleaners.

E4505 Scraper + 5 Blades **\$6.45**

E4506 5 Replacement Blades **\$1.50**

E4507 100 Replacement Blades **\$28.25**

Dine-A-Cloths

These are the best lint free cloths we have found for cleaning brayers, wiping rollers, removing ink from glass slabs and general clean up. If you are using water-based ink, you can wash the Dine-A-Cloths and reuse them again and again.

SavvySoap Hand and Brush Cleaner

Made primarily from corn oil, SavvySoap removes paint, ink and grime; restores bristles even from hardened brushes; gets ink out of clothing; neutralizes solvent odors plus it is kind to your skin. Because it contains no harmful terpinol or petroleum compounds, it is environmentally safe and biodegradable. Works with or without water and has a clean citrus scent. Conforms to ASTM D 4236 guidelines.

E1002	SavvySoap® Travel Size 2oz	\$4.95
E1015	SavvySoap® 16oz bottle	\$18.95
E1012	SavvySoap® 1 Gallon	\$67.00
E1011	Pump for Gallon container	\$6.50
E1013	SavvySoap® 1 Gallon, with Pump Save!	\$69.80

SkinSafer Barrier Cream

SkinSafer protects your hands from inks, paints, glues and grime. SkinSafer is greaseless and has a mild peppermint scent. Apply before messy jobs to protect hands and speed washing up. Conforms to ASTM D 4236 guidelines.

E1004	SkinSafer® Barrier Cream 4oz jar	\$15.45
E1006	SkinSafer® Barrier Cream 16oz jar	\$24.75

Nail Brush

These brushes have a row of bristles on each side, and work well for rubbing soap into brayer rollers as well as cleaning fingernails. Natural bristles are mounted into a hardwood handle.

E1035	1 5/16" x 3 5/8" (9.2 x 2.5cm)	\$16.95
--------------	--------------------------------	----------------

Gamsol Odorless Mineral Spirits

Most solvents are produced for the industrial paint industry where solvent strength and low cost take priority. Gamsol, available from Gamblin Artists Colors, is different. It comes from a family of solvents used in products that are expected to come into contact with the body, such as hand cleaners, cosmetics and cleaning food service equipment.

Gamsol is a petroleum distillate with 99.995% of the aromatic solvents, which are the most harmful part of petroleum solvents, refined out. It is odorless and non-toxic when used as recommended. Gamsol contains no hazardous air pollutants or ozone depleting compounds. It cannot be absorbed through healthy skin, plus it evaporates 100% and has a much higher flash point than turpentine or hardware store mineral spirits for studio safety. That said, wear gloves when cleaning up with Gamsol and store oil-soaked rags in an Oily Rag Safety Can (such as those offered by JustRite) until they can be disposed of safely. Or, soak rags in water, place them in an old jar or similar container and dispose of them outside in your household garbage can or dumpster.

Ships by UPS Ground in the contiguous U.S. only. No UPS Air or USPS shipping is allowed. 128 fl oz cannot be shipped to CA, CO, CT, DE, MD, NH, RI, or UT due to regulations regarding VOCs (Volatile Organic Compounds). Only 33.8oz (1 quart) containers of Gamsol can be shipped to these eight states.

MSDS (Material Safety Data Sheet) available on request.

K7498	33.8 fl oz (approximately 1 quart)	\$32.00

Our Guarantee and Service

McClain's Guarantee We sincerely want you to be satisfied with any product you receive from us. If you are not satisfied with an item, please contact us and arrange to return it within a reasonable time for exchange or a refund in the manner of the original payment.

The only exception to this policy is paper. Due to the fragile nature of paper and the possibility of damage in return shipping, we cannot accept returns. We strongly recommend purchasing Paper Swatches (p. 22) or one or two sheets of paper to test before buying a large quantity.

The hard steel blades on Japanese tools can chip or break due to inexperience or carving habits acquired from using poor quality or dull tools. The smallest sizes are especially vulnerable to breaking because there is not a lot of metal there. Misuse is the responsibility of the person using the tool, but if you feel that there might be a defect, please contact us. We will ask you to return the tool to us either for repair or replacement at our discretion.

Our obligation is limited to the cost of the item; shipping costs are not covered. A restocking fee equal to 10% of the value of the item will be charged for items returned after three months. We are not responsible for damage caused by misuse or abuse of our products.

Returns and Exchanges Authorization is not required if you decide to return or exchange an item. Simply choose from the following options:

1) Return the item to us with a note inside the package telling us if you would like an exchange or refund. We will take care of your request as soon as we receive your package.

2) For faster service, place an order for the replacement item(s) through our website or call 800-832-4264 (U.S.) or 503-641-3555 (local or international). We will charge you for the new order and ship it to you as soon as possible. Send back the original item, including a note telling us if you would like a credit or refund. When we receive your return, we will either issue the refund or credit your account for the cost of the original item.

Our obligation is limited to the cost of the item; shipping costs are not covered. A restocking fee equal to 10% of the value of the item will be charged for items returned after three months.

Correcting Mistakes If we make a mistake filling your order, please phone or email us and we will correct it immediately. If a return or exchange is necessary, all shipping costs will be covered.

Pricing We make every effort to maintain stable prices. However, the price of many supplies is greatly affected by the exchange rate between the U.S., U.K. and Japan. Occasionally an increase cannot be avoided and we reserve the right to adjust prices without notice.

Please visit imclains.com for the most current prices.

Professional Services

Tool Sharpening Any Japanese woodcut tool purchased from McClain's can be returned to Japan for professional sharpening. To hold down shipping and handling costs, tools are returned to Japan at the end of every odd month. Allow eight to twelve weeks for tools to make the round trip.

Daniel Jasa in the U.S. sharpens carving tools from any manufacturer and the turn-around time is faster.

Please go to www.imclains.com/profservices.html for more information on these choices.

Baren Recovering John Amoss of Tanuki Press recovers baren for a very reasonable price. Please contact John directly: tanukiprints.com/product/baren-recovering-service

Technical Questions The printmakers at McClain's are happy to talk with you about any printmaking questions you might have. Feel free to call or email.

Shopping at McClain's

McClain's is a mail-order-only business. **We do not have a store front and we are not open to the public.** Orders can be placed by mail using the order form in this catalog, fax, phone or through our secure internet site at imclains.com.

Phone or FAX Orders

U.S.: 800-832-4264 Fax: 503-641-3591

Local: 503-641-3555 International: 001+1+503-641-3555

Hours and Holidays Our office hours are 10:00 AM to 5:00 PM Pacific Time (1:00 to 8:00 PM Eastern Time), Monday through Friday. We are closed on weekends.

In 2026, McClain's will be closed on the following days: January 1, New Year's Day; May 25, Memorial Day; July 4, Independence Day; September 7, Labor Day; November 26 and 27, Thanksgiving; December 24 and 25, Christmas Holiday; and December 31, New Year's Eve.

Payment

All transactions are retail only We do not offer wholesale pricing. Quantity discounts are available on many items (see "Quantity Discount" below). Orders are not shipped until payment is received unless other arrangements have been made in advance.

Check or Money Order If you wish to pay by check or money order, please email or call us with your order. We will pack the order and contact you with the total due including shipping. We accept checks or money orders in U.S. dollars. A \$15 refiling fee is assessed on checks returned from the bank for insufficient funds.

Credit Cards We accept Visa, MasterCard, Discover and American Express credit and debit cards. We do not keep credit card numbers on file. Place your order online or fill out and send us the Order Form on the next page with your card number added under "Method of Payment."

Invoices Purchase orders are accepted from established businesses and institutions. Please contact us for quotes. Oregon does not have a sales tax, so none is charged. We invoice on the day of shipping. Terms are Net 30 days from date of invoice. Shipping is F.O.B. McClain's, Beaverton, OR. After 30 days any unpaid balance will be considered delinquent and subject to a financial charge of 1.5% per month (18% APR). Over 60 days, a rebilling fee of \$5.00 is added to the total due.

Quantity Discounts Quantity discounts are available on Shina wood blocks, ArtPrint Linoleum, Gomuban, Monotype Plates, certain carving tools and sets, Akua Ink sets, Caligo Safe Wash Relief Ink sets, Gamblin Relief Ink sets, Cuppers and all printmaking papers. For a complete list go to imclains.com/volumediscounts.html.

Gift Certificates Gift Certificates come in any amount you choose. They can be delivered to the giver or receiver by email or Priority Mail. Our Gift Certificates are honored for two years after purchase.

Hard Copy and Downloadable Catalogs New hard copy catalogs are published approximately every twelve months. Any errors are unintentional. Thank you for your help in calling them to our attention.

Catalog with an Order Feel free to request a copy of the catalog whenever you place an order. We are happy to send free catalogs to teachers for their own use and to give out to their students.

Catalog without an Order Download our most recent catalog by clicking on the catalog cover at the bottom of the left navigation sidebar on our website and print your own copy for free. If you prefer to receive a hard copy catalog by mail, there is a \$5.00 fee to cover the cost of the catalog plus shipping by First Class Mail within the U.S., \$10.00 to send the catalog internationally.

Shipping Information

We do our best to ship orders within two business days. However during busy times of the year, especially around the start of school terms and the winter holiday season, it may take longer for us to ship your order. Check our website home page for alerts about delays in shipping. If you need your supplies by a specific date, please tell us or let us know in the box marked "Special Instructions" in the shopping cart and we will do our best to make sure your order arrives in time.

Shipping rates are based on our actual cost from the carrier plus a small packaging fee. If you wish to know the exact shipping amount, please call, email or ask us in the box marked "Special Instructions" in the online shopping cart and we will be happy to give you all of your shipping options. Otherwise we will use the least expensive method. McClain's ships using either U.S. Mail or UPS. We recommend shipping by UPS because:

- Packages that do not arrive on time are easily located through the UPS tracking system at www.ups.com/track
- UPS guarantees the delivery date and then delivers on time very consistently
- Ground UPS shipping is usually less expensive if the package weighs more than 8lbs.

Orders to schools and universities are always shipped by UPS because someone signs for the package, making it easy for you to locate.

If you request that the UPS driver deliver the package without getting a signature, we will honor your request. However, in doing so you are accepting liability for the loss of the package. Neither UPS nor McClain's will reimburse you should the package be misplaced or stolen.

If you decide to have your order delivered to a different address after it has been shipped, UPS can locate the package and make this change. This will add several days onto the delivery time and you will be charged \$13.40, the same amount UPS charges us for making this change.

US Mail cannot track packages that are still in transit and they have a 30 day waiting period before considering insurance reimbursement. However, depending on destination, Priority Mail takes two to three days to be delivered, and it is usually less expensive than UPS for packages weighing 8lbs or less.

If you are facing a deadline, we can ship your order by Express Mail, UPS 3-Day Select, 2-Day or Next Day Air. Please let us know if you need your order by a particular date so we can let you know if there will be any problem with your chosen method of shipping.

Shipping By A Different Carrier

If you wish us to use a carrier other than UPS or U.S. Mail, let us know that you will be using a different carrier in the box labeled "Special Instructions" in the shopping cart. Our normal packing fee will be charged but you will not be charged for shipping. We will let you know when the package is ready to be picked up. Send a request to your carrier asking them to pick up the package using a return shipping label (DHL calls this service "Pickup and Return on Demand" (PROD) and FedEx calls it "Express Tag").

Shipping to Alaska and Hawaii

Orders to Alaska and Hawaii are only sent by USPS Priority Mail unless you specifically request otherwise. Please call or email if you would like an estimate of the different shipping costs.

International Shipping

Recipients of international shipments are responsible for all duty and taxes. Call 011+1+503-641-3555 to place orders by phone, or place your order through our secure website. We will pack your order, contact you with your shipping choices and rates, and then wait for your decision before charging anything on your credit card or shipping the order to you. For more information about international shipping, please go to imclains.com/internationalship.html.

Backorders

Occasionally we have to backorder an item. You are not charged for the item until it is shipped and no additional shipping is charged on backordered items. We automatically ship backorders that can be filled within one month after the order was placed. After that, we will contact you to make sure you still want the item before we ship.

Damaged Shipments

Open and inspect your order as soon as you receive it. If an item has been damaged in shipping, please keep it and save all of the packing materials. Call or email us immediately and we will take care of the problem.
